Dedicated Bandwidth

Committing to a specific rate of bandwidth allows you to take advantage of our discounted bandwidth pricing. It will also help you easily budget your colocation services, since your bandwidth charges will not vary month to month. Velocity will put a hard threshold on your committed bandwidth so you do not go over your allotted rate. We recommend using our Dedicated Bandwidth service.

Burstable Bandwidth

If you prefer to have more flexibility in your bandwidth, we can leave your bandwidth as Burstable. Your usage will be measured on a monthly basis and charged based on the 95th percentile. The 95th percentile is calculated by polling both inbound and outbound bandwidth utilization every five minutes. All of the samples that were pulled throughout the month are then ordered from highest to lowest. The top five percent of readings are then discarded, and you are billed based on the next highest reading. Burstable Bandwidth is billed the month after the usage occurs.
