V-Mail Set-Up Instructions

V-MAIL VOICE MAIL STRUCTURE:

STEP 1:

Set-up your Voice Mail Personal Greeting

- Dial the unified messaging number assigned to you in your welcome e-mail.
- Interrupt the greeting by pressing 7. If you are dialing from your direct telephone number, you will automatically be asked to enter your PIN without pressing 7.
- Enter your PIN.
- From the main menu:
 - Select 4 for administrative options
 - Select 3 for greetings and recorded name
 - Select 1 to change your greeting
- Select 1 for a standard greeting with your direct telephone number.
- Select 2 for a standard greeting with your name.
- Select 3 for a personal greeting.

STEP 2:

Install and configure the V-Mail Call Manager software.

- Download the software installer from the Velocity Telephone website. (www.velocitytelephone.com).
 - Save the installer to a known location on your hard drive (such as your Desktop).
 - Double click on the installer. (Note: If a window is displayed stating your operating system does not know how to open ".msi" files, you will need to install a Windows Installer Engine before proceeding).
 - Download Windows Installer Engine for Windows 95/98/ME
 - Download Windows Installer Engine for Windows NT/2000
- These may be downloaded from the Velocity Telephone website: www.velocitytelephone.com.*
- Proceed through the installation wizard. Before the installer completes the installation process, a Networking Configuration window will be displayed. Enter your unified messaging phone number and PIN provided in your welcome e-mail, and press OK.
